

TDI SIGNS JOINT DEVELOPMENT AGREEMENT WITH HYDRO-QUÉBEC

Transmission Developers Inc. (TDI) announced that the company has signed a joint development agreement with Hydro-Québec regarding the development of the Champlain Hudson Power Express transmission project. Hydro-Québec has undertaken the studies necessary for the infrastructure development to connect the CHPE line to the Québec transmission system. The joint development agreement will facilitate coordination of efforts on both sides of the border throughout the design, engineering, permitting and procurement phases of the project.

TDI President and CEO Donald Jessome said, “We are extremely pleased to have entered this agreement with Hydro-Quebec and look forward to working in a collaborative, cooperative manner to bring clean, reliable, economically-priced power from Canada to New York. This agreement is an important step in TDI's project development process.”
