**TRANSMISSION DEVELOPERS INCORPORATED NAMES WOODROW ‘WOODY’  
CROUCH AS NEW VICE PRESIDENT OF ENGINEERING AND CONSTRUCTION**

Transmission Developers Incorporated (TDI) is pleased to announce that Woodrow (“Woody”) Crouch has joined the TDI team as its new Vice-President of Engineering and Construction as of September 17th, 2012. Woody is an extremely well respected leader in the energy sector and can call upon decades of experience as a senior executive supervising the design and construction of electrical transmission, distribution and generation projects.

As the former Vice-President of Engineering, Construction and Project Management for the New York Power Authority, Woody was responsible for over 1,400 miles of transmission lines, the Clark Energy Center, numerous substations and 6,000 MW of generation capacity. Woody’s wealth of experience will be put to good use at TDI as he helps to move the Champlain Hudson Power Express, the 1,000MW HVdc line that will serve New York City and surrounding areas, from the drawing board to the construction and operational phase.
