Subject: RE: CHPE Collocated Infrastructure Details_EM&CP 6 Athens Generating

Thank you Kyle – this info is very helpful. I expect the plan will be for the designers to update the plan/profile and provide revised drawings. Method of install, depth of cable (trench or directional drilling), and path of cable should all be provided on the revised docs (and if something is missing we'll address accordingly).

Thanks,

Ben Cole

Hi Ben,

It was nice speaking with you this afternoon. Please find the attached documents showing the location of our buried infrastructure [REDACTED] Any information you can provide back that would affect New Athens Generating such as; method of install, depth of cable (trench or directional drilling), and path of cable would be greatly appreciated.

Best Regards,

Kyle Kubler
O&M Manager at New Athens Generating

Generating

Hi Steve,

Glad to speak with you earlier this week. Please find attached a working draft, in-progress plan/profile set for the areas adjacent to the Athens Generating facility. Athens utility information has not yet been added to the attachment. Any as-built drawings or other location/utility details that you can provide will be useful in accurately depicting the Athens lines on revised drawings, which CHPE will provide when complete, and ask for your feedback.

I see you are out until 10/26. At your earliest convenience please let me know and I'll coordinate with you to request as-built drawings via the procedure that you briefly outline when we talked. Please also let me know if your facility has other requirements of which we should be aware.

Thank You,

Ben Cole

Hi Tim,

Thanks for reaching out. Feedback we are interested in includes any comments you may have on the project alignment, separation distances from State Tel infrastructure (CHPE is maintaining a minimum of 5' horizontal and 2' vertical), crossing requirements, or anything along those lines that we should be sure the CHPE designers are aware of.

Thank You,

Ben Cole

To: homer@statetel.com
Subject: CHPE Collocated Infrastructure Details_EM&CP 6 State Telephone

Good Evening,

I'm writing on behalf of Transmission Developers Inc. ("TDI"), owner of the Champlain Hudson Power Express ("CHPE" or "Project") transmission line project. The purpose of this correspondence is to provide more detailed information related to how the CHPE project is designed to interact with your infrastructure and to solicit feedback from your company regarding the Project's alignment.

As you may recall from previous communications from Rick Chase at TDI, the CHPE is a fully permitted 339-mile underground and underwater high voltage direct current (HVDC) electric transmission line that will import up to 1,250 MW of renewable power from Canada and send it to the New York City metro area (see <https://chpexpress.com> for additional information).

At the link below please find design drawings of the proposed CHPE alignment where it involves your infrastructure within the Segment 6 Environmental Management and Construction Plan ("EM&CP") Package 6.

Link: [Package 6 State Telephone Co-Located Infrastructure 2022-09-15.pdf](#)

TDI will be submitting these plans to the New York State Public Service Commission ("PSC") for portions of the Project in the Towns of Coeymans, New Baltimore, and Coxsackie. This information is a follow-up to previous communications to you providing general project information and typical infrastructure crossing drawings.

Please review the linked information regarding the CHPE alignment relating to your infrastructure and provide concurrence with the Project's cable separation and alignment and any feedback to me (ben.cole@wsp.com) by October 7, 2022. It is important to TDI that the construction and operation of the CHPE project does not interfere with the continued operation of your infrastructure.

To the extent that the CHPE alignment interacts with your infrastructure within future Segment EM&CP submissions, we will provide you with similar drawings in advance of those filings. I look forward to coordinating with you as we finalize the design of the CHPE project.

Sincerely,

Ben Cole

WSP USA, on behalf of TDI

Thank you Frank - that's helpful. I have a couple questions.

Can you look at the three packages at the links; refer to the table that's found on the first page of each package, and confirm accuracy (does your company own the line? is the info in the table accurate?) I see the following # of crossings per package:

Telergy Package 5A	1 crossing
Dominion Pckg 5A	5 crossing
Elantic Pckg 5A	1 crossing

My understanding is Windstream owns Telergy, Dominion, and Elantic.

Are there any crossings missing? This CHPE package (5A) runs from Rotterdam to Selkirk.

Thank you for the help.

Subject: RE: CHPE Collocated Infrastructure Details_EM&CP_3 and 6 Dominion Telecom and Telergy

Mr. Halas hello again.

As soon as I sent the last message I learned that Elantic is now Windstream so I have one more package that we need to ask for your comment on (four packages currently, including the three linked at the bottom of this thread).

Links:

[CHPE-SUB-0108-00-Elantic Telecomm - Utility Matrix 8.23.2022.pdf](#)

[CHPE-SUB-0108-00-Dominion Telecom - Utility Matrix 8.23.2022.pdf](#)

[Package 6_Dominion Telecom_Co-Located Infrastructure_2022-09-14.pdf](#)

[Package 6_Telergy_Co-Located Infrastructure_2022-09-15.pdf](#)

Thank You,

Ben Cole

Thank you Mr. Grodi.

Mr. Halas can you please review the information in the message and links below? Please let me know any comments/feedback on how the CHPE alignment should interact with Windstream infrastructure.

Thanks,

Ben Cole

Good morning Mr. Halas & Mr. Grodi,

Can you please advise who the correct contact person for the below request.

Mr. Cole,

Damage Prevention (Locate Desk) is not involved with any type of work involving Windstream facilities and does not have information regarding Windstream facilities. My primary task is to provide requested mapping.

Thank You,

locate.desk@windstream.com

Subject: CHPE Collocated Infrastructure Details_EM&CP_3 and 6 Dominion Telecom and Telergy

Good Evening,

I'm writing on behalf of Transmission Developers Inc. ("TDI"), owner of the Champlain Hudson Power Express ("CHPE" or "Project") transmission line project. The purpose of this correspondence is to provide more detailed information related to how the CHPE project is designed to interact with your infrastructure and to solicit feedback from your company regarding the Project's alignment.

As you may recall from previous communications from Rick Chase at TDI, the CHPE is a fully permitted 339-mile underground and underwater high voltage direct current (HVDC) electric transmission line that will import up to 1,250 MW of renewable power from Canada and send it to the New York City metro area (see <https://chpexpress.com> for additional information).

At the links below please find design drawings of the proposed CHPE alignment where it involves your infrastructure within the Segment 6 Environmental Management and Construction Plan ("EM&CP") Package(s) 3 & 6.

Link: [CHPE-SUB-0108-00-Dominion Telecom - Utility Matrix 8.23.2022.pdf](#)

Link: [Package 6 Dominion Telecom Co-Located Infrastructure 2022-09-14.pdf](#)

Link: [Package 6 Telergy Co-Located Infrastructure 2022-09-15.pdf](#)

TDI will be submitting these plans to the New York State Public Service Commission ("PSC") for portions of the Project in the Towns of Wilton and Athens. This information is a follow-up to previous communications to you providing general project information and typical infrastructure crossing drawings.

Please review the linked information regarding the CHPE alignment relating to your infrastructure and provide concurrence with the Project's cable separation and alignment and any feedback to me (ben.cole@wsp.com) by October 7, 2022. It is important to TDI that the construction and operation of the CHPE project does not interfere with the continued operation of your infrastructure.

To the extent that the CHPE alignment interacts with your infrastructure within future Segment EM&CP submissions, we will provide you with similar drawings in advance of those filings. I look forward to coordinating with you as we finalize the design of the CHPE project.

Sincerely,

Ben Cole
WSP USA, on behalf of TDI
